

ENVIRONMENTAL POLICY

Aqua Environmental is committed to delivering high quality water main leak detection service in a manner that is non-invasive, efficient and environmentally friendly. We are proud to be in partnership with water authorities and companies that are proactive in reducing water leakage in an environmentally friendly manner.

Aqua Environmental will continually improve in our environmental performance and are currently accredited to ISO 14001 until November 2012. At present we conduct bi-annual reviews of our Management Systems and are proud of our record of no environmental incidents from any of our services.

Reduce, Reuse and Recycle:

- We actively encourage all our staff to reduce, reuse and recycle.
- Our offices and workshops have recycling bins in place for paper, cans and bottles.
- These recycling bins are collected and correctly disposed of each week.
- We use energy efficient equipment where possible.
- We purchase supplies, where possible, with little or no packaging.
- All printing of documents shall be double sided where suitable.
- Use draft quality printing where suitable.

Environmental Performance:

- During our field services we ensure there is as little or no disturbance to the flora and fauna.
- We do not use substances or chemicals that will endanger the environment.
- We will work closely with all Clients to ensure we deliver our services in an environmentally friendly manner and to their met or exceed their expectations.
- We are always receptive to new guidelines with regard to environmental issues and understand its importance for the future generations.

Minimising Impacts:

- We will respond immediate to any environmental incidents and will contact the appropriate authorities where applicable.
- We will use products that are environmentally friendly, where available.
- We will encourage staff to take the environment seriously.

Hugh Chapman Jr.
